Sunil Sakri

Product@Tesco
Bengaluru, Karnataka, India

Summary

I build supply chain systems that move goods more efficiently at scale.

At Tesco, I own the ordering engine behind one of the UK's largest grocery networks — 500K+ SKUs, multi-depot distribution, millions of orders weekly. I led the platform's modernization from a legacy monolith to an API-first architecture, then layered in ML-driven forecasting, real-time demand signals, and inventory optimization algorithms that measurably moved the needle

Experience

Tesco Technology

3 years 7 months

Product Manager - Supply chain and fulfillment

February 2023 - Present (3 years 7 months)

Bengaluru

Owned end-to-end product strategy for Tesco's national ordering engine — the core system determining what gets ordered, in what quantity, from which supplier, to which depot — across 500K+ SKUs.

Led platform modernization from legacy architecture to API-first design, enabling modular algorithm releases and cutting deployment cycles from weeks to days.

Associate Product Manager

February 2023 - November 2024 (1 year 10 months)

Bengaluru, Karnataka, India

Led the inventory management initiatives for Tesco's distribution network (fresh and ambient distribution centers) through Warehouse Management System (WMS)

- Defined the product vision and created a roadmap by analyzing the current state of inventory management, prioritizing issues like stock discrepancies and inefficient tracking, projecting annual savings of £220K

- Led cross-functional initiatives, collaborating with legal, UX, and engineering teams to implement automated solutions that optimized operational processes. This resulted in enhanced compliance, improved productivity, and annual cost savings of £750K across areas, including inventory management and workflow efficiency

Optum

Associate Product Manager - Payments Integrity

May 2022 - February 2023 (10 months)

Hyderabad, Telangana, India

Managed the B2B claims overpayment recovery platform aimed at helping insurance companies in US healthcare segment recover overpaid claims amount from healthcare providers through a streamlined workflow designed to consistently nudge the healthcare providers to pay back the insurance companies

- Conceptualized and launched multiple capabilities simplifying the claims overpayment process for insurance companies, resulting in an total annual savings of \$890K
- Led the cross function efforts with operations and business teams simplifying the experience of outreach to healthcare providers, decreasing the turn around time for each claim recovery by ~15%

The ProdZen

Intern

November 2021 - January 2022 (3 months)

- Built a top-down market-sizing model for one of the B2B SaaS clients in the pharma contract manufacturing segment
- Conducted primary research to understand needs of customers in pharma supply chain segment

Optum

Product Management Intern

May 2021 - July 2021 (3 months)

Hyderabad, Telangana, India

- Conducted market assessment for the Lifesciences industry in U.S. to identify potential market opportunities
- Performed competitor analysis of 5 competitors and identified gaps in Optum's product suite

- Conducted a segment analysis, identified use cases and recommended features for the healthcare predictive platform to commercialize the offering to the leadership

Ernst and Young

Software Engineer

July 2016 - June 2020 (4 years)

Bangalore

- Developed user interactive applications aimed solving various problems for customers across US Tax, Wealth management and fraud dispute and due diligence segments
- Improved functionalities and application programming interface (API) by designing and implementing cross-platform frameworks
- Optimized the agile product development cycle by creating re-usable components reducing the development cycle

Indian Institute of Technology, Guwahati

Summer Intern

May 2015 - July 2015 (3 months)

India

Acoustic phonetic analysis of fricatives (Speech recognition)

Education
